

Project Profile

Multiple Hospital & Medical Facilities

ACM Worldwide has been involved in the construction of numerous hospitals and medical facilities. Our experience ranges from state of the art, multi-bed hospitals, to retirement centers and doctor's offices. We have built surgery theatres in the Middle East for both civilian and military applications. We have recently conducted feasibility studies for medical waste disposal facilities in Africa. ACM Worldwide has a team of engineers and architects available who understand the unique challenges this type of construction entails. Some of those challenges include working with nuclear medicine, robotic surgery, emergency and trauma medicine. No other type of construction has grown as quickly as this field.

Examples of Projects

- ◆ Assisted Living Facilities
- ◆ Multi-bed Hospitals
- ◆ Retirement Communities
- ◆ Waste Disposal
- ◆ Doctor's Office Complex's
- ◆ Dental Clinics
- ◆ Emergency & Trauma Ctrs.
- ◆ Mobile Surgeries
- ◆ Research & Development
