

Project Profile

Ajo Virtual Fence Tower Project

ACM Worldwide has been involved in the construction of Virtual Fence along the southern U.S. border. Due to cost overruns and time delays, the primary contractor found themselves in a precarious situation. Faced with the loss of the contract as well as penalties, they requested our services in managing and constructing a portion of the "Fence". ACM was faced with the challenge of interfacing a portion of the "Fence" that had not yet been started with that part of the project that had been completed. The challenge was further complicated by the short timeline allowed to complete the project. We are proud to relate that not only did we complete our portion of the project, we came in under time and at budget.

Details of Project

- ◆ Foundation Design & Install
- ◆ Tower Erection
- ◆ Fence Construction
- ◆ Soil Stabilization
- ◆ Road Grading & Construction
- ◆ Site Survey
- ◆ Certification (Fed. Guidelines)
- ◆ Mandatory Completion Timeline
